

# CommerceCareAI - Customer Support FAQ & Troubleshooting

Document Reference: FAQ-SUP-2026-V5 | Effective Date: July 1, 2026 | Scope: Customer Support Knowledge Base

This repository provides immediate resolution answers for order modifications, billing inquiries, system error codes, tax invoices, cross-document policy interactions, and live support escalation protocols within the CommerceCareAI ecosystem.

## 1. Order Cancellation & Modification Queries

### Q1.1: How can I cancel an order I recently submitted?

Answer: You can self-cancel your order directly through the portal as long as its operational status shows Order Processing or Preparing in Warehouse. Go to My Orders > Cancel Order. An instant full refund will be triggered to your original payment card.

If the order status has progressed to Dispatched / In Transit, automated cancellation is no longer possible. In this scenario, simply decline physical acceptance when the courier arrives at your address, and a refund will be processed upon package return.

### Q1.2: Can I modify my delivery address after completing checkout?

Answer: Address updates are permitted within 30 minutes of order placement via the customer self-service dashboard. Once warehouse picking begins, address changes can only be requested by contacting carrier phone support directly with your tracking code.

## 2. System Payment Error Codes & Resolution Matrix

If your transaction fails during checkout, match the error code displayed on screen with the diagnostic resolution steps below:

| Payment Error Code | Root Cause / System Diagnostic                     | Immediate Recommended Action                                                       | Escalation Pathway                     |
|--------------------|----------------------------------------------------|------------------------------------------------------------------------------------|----------------------------------------|
| ERR_PAY_402        | Insufficient Account Balance / Card Limit Exceeded | Check available balance on banking app or select alternative credit card.          | Issue with Card Issuer Bank            |
| ERR_CARD_301       | 3D Secure SMS Authentication Failed or Timed Out   | Verify mobile phone number registered with bank and request fresh SMS OTP code.    | Bank Mobile Auth Service               |
| ERR_AUTH_500       | Bank Gateway Timeout / Server Unresponsive         | Wait 10 minutes and attempt transaction retry; avoid rapid multiple button clicks. | CommerceCareAI Payment Operations Desk |
| ERR_3DS_403        | Card Blocked for International / E-Commerce Usage  | Open bank app and toggle 'Enable Internet / Mail-Order Transactions' to ON.        | Card Issuing Bank Support              |

## 3. Corporate Billing, Invoicing & Tax Information

### Q3.1: How do I obtain an official Corporate Tax Invoice for business expenses?

Answer: During checkout under the Billing Information section, select the Corporate Invoice toggle. Input your registered Business Title, Tax Office, and Tax Identification Number. Official e-Invoices are dispatched in PDF format to your registered account email within 24 hours of shipment fulfillment.

**Post-Fulfillment Modification Limit:** Tax regulations strictly prohibit modifying billing titles or tax IDs on e-Invoices once the billing document has been formally transmitted to revenue authorities. Please ensure tax details are verified prior to order placement.

## 4. Cross-Document Policy Interactions (Multi-Doc Scenarios)

**Scenario 4.1: I received an item that is both opened and defective. Which policy applies?**

Answer: While 1\_Return\_and\_Refund\_Policy.pdf excludes opened hygiene or audio items from standard 'Change of Mind' returns, a verified manufacturing defect overrides hygiene restrictions. Defective items fall under 3\_Product\_Warranty\_and\_Maintenance\_Guide.pdf and qualify for immediate free exchange or full refund regardless of packaging status.

**Scenario 4.2: My return shipment was delayed by the courier beyond the 14-day window. Will my refund be rejected?**

Answer: No. As long as you generated your return RMA shipping label within 14 days of delivery, transit delays caused by courier partners covered under 2\_Shipping\_and\_Delivery\_Terms.pdf will not invalidate your return eligibility.

## 5. Live Agent Escalation & Support Ticket SLAs

Our CommerceCareAI virtual assistant solves over 88% of customer queries automatically. However, if human intervention is required, simply type Connect to Human Agent in the chat window.

- **Live Chat Hours:** 24/7 Availability (Human agents active Monday-Saturday, 09:00 - 18:00 EST).
- **Average Agent Queue Time:** Less than 3 minutes during active business hours.
- **Email Support Desk:** Submit tickets via support@commercecare.ai (Guaranteed initial SLA response within 4 hours).
