

CommerceCareAI - Global Return and Refund Policy

Document Reference: POL-RET-2026-V4 | Effective Date: July 1, 2026 | Scope: Global E-Commerce Operations

This policy outlines the rules, timelines, exceptions, and procedures regarding product returns, exchanges, and financial refunds for transactions processed on the CommerceCareAI platform and powered merchant storefronts. All policies strictly comply with international consumer protection standards and local e-commerce regulations.

1. Statutory Withdrawal Right & General Conditions

Customers possess an absolute statutory right of withdrawal from any purchase contract within 14 calendar days starting from the physical delivery date of the package, without the requirement to state any specific justification or incur contractual penalties.

Mandatory Requisites for Return Acceptance:

- The item must be completely unused, unworn, unwashed, and in pristine resalable condition.
- All original manufacturer labels, tags, security seals, and serial number stickers must remain firmly attached.
- The product must be enclosed within its original factory packaging, including all protective foams, manuals, cables, and bundled promotional items.

Conditional Exception: Custom-manufactured, personalized, or custom-engraved merchandise (e.g., jewelry engraved with custom names or garments tailored to bespoke measurements) is strictly excluded from the statutory right of withdrawal, unless a verified manufacturing defect or material flaw is confirmed by our inspection team.

2. Non-Returnable Categories & Hygiene Restrictions

Due to health protection, personal hygiene regulations, and intellectual property constraints, the statutory right of return is immediately voided once protective seals, shrink wraps, or hygiene strips are opened or tampered with on the following product categories:

- Personal Audio & In-Ear Wear:** In-ear headphones, earbuds, and audio headsets with ear cushions once the factory seal is broken.
- Hygiene & Personal Care Electronics:** Electric toothbrushes, hair trimmers, shavers, epilators, and skin care applicators.
- Intimate Apparel & Cosmetics:** Undergarments, swimwear, hosiery, opened skincare creams, perfumes, and lip products.
- Digital Goods & Software:** Downloadable software licenses, gaming activation codes, digital gift cards, and unsealed optical media.

Hygiene Inspection Protocol: All returned items in personal electronics or apparel categories undergo secondary laboratory inspection under UV light. Any trace of bodily fluids, hair, or cosmetic transfer will result in immediate rejection of the return claim, and the item will be shipped back at the buyer's expense.

3. Return Shipping Costs & Refund Processing Matrix

The financial responsibility for return shipping logistics, as well as the applicable processing timeline, depends directly on the categorized return reason as outlined in the matrix below:

Return Classification	Shipping Fee Responsibility	Inspection Window	Refund Processing Time	Primary Refund Method
Standard Withdrawal (Buyer Change of Mind)	Deducted from Refund (\$4.50 fixed fee)	24-48 Hours	3 to 5 Business Days	Original Payment Method
Manufacturing Defect / Faulty Item	CommerceCareAI Covered (Prepaid Label)	24 Hours	1 to 2 Business Days	Immediate Refund or Direct Exchange
Transit Damage / Broken Package	CommerceCareAI Covered (Prepaid Label)	48 Hours	1 to 2 Business Days	Immediate Replacement or Store Credit
Incorrect / Missing Item Sent	CommerceCareAI Covered (Prepaid Label)	Same Day	Immediate Dispatch	Priority Expedited Shipping of Correct Item

4. Transit Damage & Cargo Assessment Reports

When receiving physical shipments from courier partners, customers are required to examine the outer shipping container for visible crushing, tears, moisture damage, or opened tape prior to signing the delivery confirmation sheet.

If visible damage is observed, the recipient must request the delivery driver to issue an official Cargo Damage Assessment Report before accepting or rejecting the parcel. Return claims for transit damage submitted without an official report require extended manual review lasting up to 10 business days and are subject to courier verification approval.

5. Refund Channels & Banking Processing Rules

Once a returned item successfully passes quality control inspection, financial refunds are automatically initiated according to the following channel-specific rules:

5.1 Credit Card Installment Transactions

For purchases paid via credit card installment plans, CommerceCareAI transfers the full aggregate refund amount to your issuing bank in a single lump sum transaction. However, depending on your bank's internal accounting policies, the refund credit may appear on your monthly billing statements in monthly installments equal to the original payment schedule.

5.2 Store Credit & Wallet Top-Ups

Customers selecting CommerceCareAI Wallet Store Credit as their preferred refund method receive an instant credit addition upon return inspection approval, along with a bonus 5% Store Credit Boost applicable to future marketplace purchases.

6. Step-by-Step Online Return Process

1. Log into your customer portal and navigate to My Orders > Initiate Return.
2. Select the specific order item, upload 2 high-resolution photos displaying product condition, and select the appropriate return reason.
3. Generate and print the automated Prepaid RMA Shipping Label and Return Slip.
4. Place the item securely in original packaging along with the Return Slip inside a shipping box.
5. Drop off the package at any authorized courier partner location within 7 days of RMA generation.
