

CommerceCareAI - Shipping and Logistics Terms

Document Reference: LOG-SHIP-2026-V2 | Effective Date: July 1, 2026 | Scope: Global Logistics

This document governs the fulfillment schedules, freight pricing structures, volumetric weight calculations, delivery guarantee SLA commitments, and customs compliance protocols across all merchant networks under CommerceCareAI management.

1. Order Processing Schedules & Cut-Off Windows

All orders placed on the platform undergo automated fraud prevention verification and warehouse allocation. Processing schedules strictly adhere to the following operational cut-off times:

- Standard Business Day Cut-Off:** Orders placed before 15:00 (3:00 PM) local warehouse time on business days (Monday through Friday) are processed, packed, and handed over to logistics carriers on the same business day.
- Late Orders & Weekends:** Orders submitted after 15:00, or placed during Saturdays, Sundays, and national public holidays, are scheduled for primary dispatch on the immediately following business day.
- Peak Season Handling:** During major promotional events (e.g., Black Friday, Cyber Week, New Year Campaign), standard processing times may be extended by up to 24-48 additional operational hours.

2. Shipping Fee Structure & Volumetric Weight Matrix

Freight pricing is calculated based on either the actual physical weight (in kg) or the volumetric dimensional weight, whichever value is higher. The dimensional formula utilized is: $\text{Dimensional Weight} = (\text{Length cm} \times \text{Width cm} \times \text{Height cm}) / 5000$.

Free Shipping Threshold: Domestic orders with a total net subtotal of \$75.00 or greater automatically qualify for Free Standard Delivery. For orders below this threshold, a flat standard rate of \$5.50 applies for base weight brackets.

Volumetric Weight Bracket	Primary Regional Zone	Secondary Regional Zone	Remote & Mobile Zone	Express Next-Day Freight
0.0 to 3.0 Unit	\$4.50	\$5.50	\$5.50 + \$3.50 Surchage	\$9.50
3.1 to 10.0 Unit	\$7.50	\$9.00	\$9.00 + \$5.00 Surchage	\$15.00
10.1 to 20.0 Unit	\$13.00	\$16.00	\$16.00 + \$8.00 Surchage	\$26.00
20.1+ Unit (Heavy Pallet Cargo)	Special Freight Quote	Special Freight Quote	Scheduled Liftgate Delivery	N/A

3. Target Estimated Delivery Timeframes (TET)

Shipment delivery timeframes depend on destination geography relative to fulfillment distribution hubs:

- Metropolitan Centers (Tier 1 Cities):** 1 to 2 business days following warehouse dispatch.
- Regional Hubs & Secondary Cities (Tier 2 Cities):** 2 to 3 business days following warehouse dispatch.
- Rural Districts & Island Territories (Tier 3 / Mobile Zones):** 3 to 5 business days, subject to courier regional visit schedules.

4. Delivery Delay Compensation Policy & SLA Guarantees

CommerceCareAI monitors every active shipment via real-time API integrations with courier partners. If a shipment exceeds its promised Target Estimated Delivery Timeframe (TET), automated customer compensation is triggered according to the following SLA terms:

Delay Compensation SLA Matrix:

- **2 Business Days Delay:** Automatic \$5.00 Discount Voucher credited to customer account.
- **5+ Business Days Delay:** Full refund of paid shipping fees plus a \$15.00 Convenience Voucher.
- **Lost Package Status (10+ Days Inactive Transit):** If a courier tracking scan remains inactive for 10 consecutive days, the package is declared lost. An immediate full order refund or priority replacement dispatch is executed automatically.

5. International Deliveries, Customs Duties & Tariffs

For cross-border shipments originating outside the destination country's customs territory, deliveries are processed under either DDP (Delivered Duty Paid) or DDU (Delivered Duty Unpaid) terms depending on selected service tier:

5.1 DDP (Delivered Duty Paid) Service

All applicable import tariffs, customs processing fees, and local value-added taxes (VAT) are calculated at checkout and collected upfront. Packages clear customs clearance seamlessly without local courier payment collection.

5.2 DDU (Delivered Duty Unpaid) Service & Abandonment Fees

Customs duties and import taxes are assessed by local border agencies upon package arrival. The recipient is solely responsible for paying customs clearance fees directly to the courier or border authority. If a customer refuses to pay customs tariffs and abandons the parcel, return freight fees and administrative penalties will be deducted from the customer's purchase refund.

6. Address Modification, Delivery Attempts & Branch Pickup

Couriers will make up to 3 official delivery attempts at the designated recipient address. If delivery fails on all 3 attempts, the parcel will be transferred to the local courier distribution branch and held for 3 business days for recipient pickup.

Once a package reaches 'Out for Delivery' status, shipping address modifications cannot be processed through the online portal; address corrections must be arranged directly with carrier telephone support.
